A premium blend of crushed quartz, white cement, and mineral-based pigments, QuartzScapes formulated surface systems merge beauty and strength for a stunning pool finish. Natural quartz is one of the world’s strongest minerals. QuartzScapes interior pool finishes are a rich blend of brilliance, texture, and strength.

Water Color

Is in the Eye of the Beholder

First, decide whether you would like the water in your pool to appear blue or green.
For water that looks primarily blue, select a finish with white, blue, or gray pigment. For water that appears green, look for green, tan, brown or black pigment.

The darker your finish, the darker your pool water will be.
The deeper the water, the darker it will appear. Water will seem lighter in shallower areas like steps, ledges, benches, and beach entries where the finish itself is more visible.

Since your pool water will mirror its surroundings, many other factors will impact water color:
- The design, shape, and depth of your pool
- The time of day and position of the sun
- Whether the sky is sunny, stormy, or overcast
- Your region of the country
- The chemistry of your water
- Trees, bushes, and other foliage around your pool
- Colors in your home's exterior
